

LANDSUPPORT FINAL CONFERENCE

We are pleased to invite you to the Final Conference of our Horizon2020 project LANDSUPPORT, taking place at the University of Naples, in Portici, Italy on 26-28 April 2022.

The final conference will be the opportunity for the consortium to come together one more time within our project framework to share and discuss the results, insights and experience of our ambitious project as it comes to an end. It will be another milestone to finalize this project on a high endnote *and* lead into a *new era of improvements in soil health and soil policy implementation*.

The first day is dedicated to an internal meeting for LANDSUPPORT partners, Scientific Advisors and Delegates of the European Commission only in which we will walk you through our achievements and portray the legacy of our 4 years project.

In addition to focusing on the project itself for the first day, the following 2 days will focus on promoting the results of our very ambitious project with any stakeholders, including scientific community, decision-makers and policy-makers. We thus foresee a two-day workshop to engage end-users from three different fields: agriculture, land degradation and land take, ecotourism and biodiversity.

Due to the current COVID situation, we may extend the registration deadline by 1 month, until Friday, 25 February 2022. Please register [via this link](#).

In case of any questions or queries, please do not hesitate to reach out to the project management team at Modis via: management@landsupport.eu

Looking forward to welcoming you in Portici!

With best wishes,
Anca Florea, Kathrin Prebeck, Angelo Basile and Fabio Terribile
For LANDSUPPORT
